

## **Is Venus Freeze Right For You?**

Are you dissatisfied with the contours of your body? Are diet and exercise not helping you lose weight or feel more confident? Maybe it's time to try Venus Freeze, now available at Arora Dermatology in Detroit, Michigan.

### **What Is Venus Freeze?**

Don't be fooled by the name. There is no "freezing" involved in Venus Freeze. On the contrary, patients usually compare the treatment to receiving a relaxing, hot stone massage. There are no needles or chemicals involved. More importantly, the treatment takes less than an hour - about 15 minutes for the face and 40 minutes for the body.

Venus Freeze is a safe, advanced, non-invasive fat reduction and skin tightening treatment used to treat wrinkles and reduce circumferential fat. It uses an extremely low-risk radiofrequency technology, called MP 2, that heats the skin from the inside out without the threat of laser burns. Consequently, the treatment does not damage your skin.

Venus Freeze transports Multi-Polar Radio Frequency and Pulsed Magnetic Fields to the skin that prompts collagen production and contraction, fibroblast proliferation, neo-vascularity, and lipolysis. These stimulations cause skin tightening that generate pleasant results.

### **How long do the results of Venus Freeze/ Legacy last?**

Clients often see results of Venus Freeze after their first session. Long term results can be achieved in as few as six to eight treatments. Some clients continue to see an improvement in their skin for up to three months after completing a series of treatments.

To maintain the effects of Venice Freeze, you will require regular treatments for your continued, desired results. At a minimum, we recommend one treatment every season, or four treatments per year.

### **Who Is Venus Freeze For?**

The Venus Freeze treatments can be applied on all skin types because they don't use lights or lasers. If you are considering the treatment, ask yourself the following questions:

- Do you feel that your appearance could be slightly improved by skin tightening?
- Are you a post-pregnancy mother looking to eradicate saggy skin?
- Are you a man who wants to improve the look, feel and shape of resistant areas that do not respond to traditional exercise and diets?

- Are you an elder person who wants to eliminate wrinkles on your skin?
- Are you looking for non-invasive and pain-free treatment?

If you can answer “yes” to any of the above questions then Venus Freeze is definitely for you.
